

Lab 04

Name Kaniz Fatema

ID: 20245103154

1. Creating a new database:

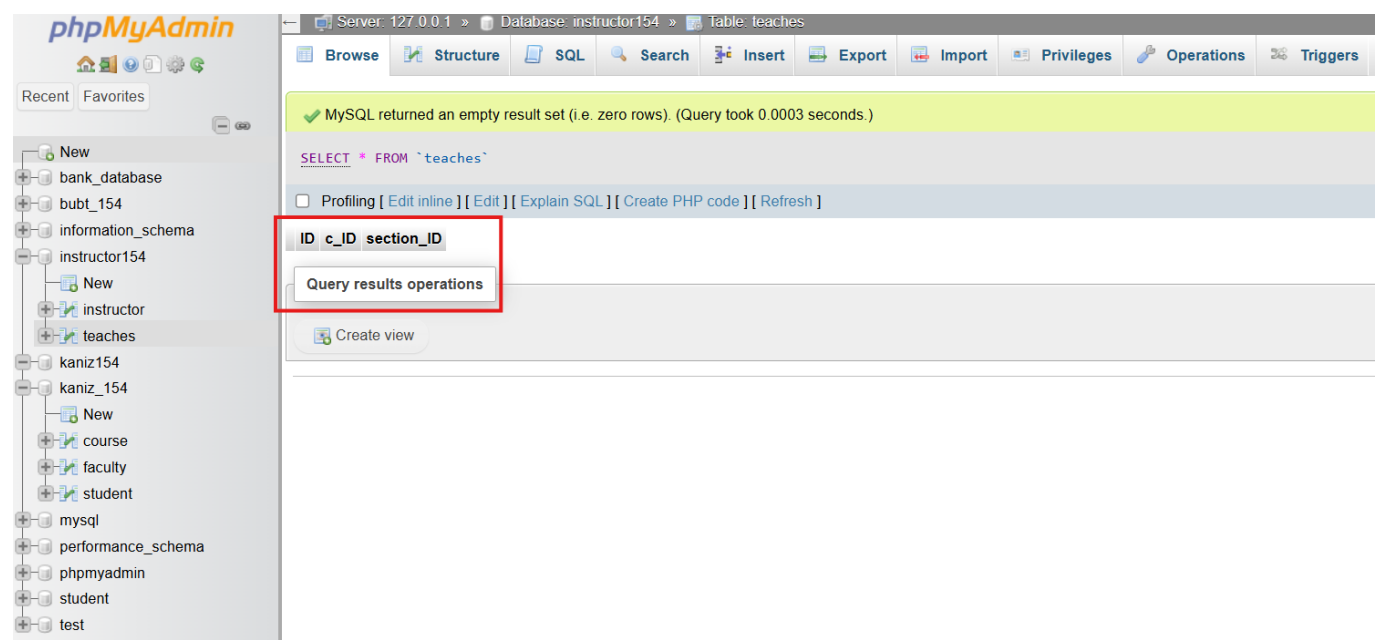

```
CREATE DATABASE bank_database;
```

2. Create 6 tables in this DB named: **account**, **branch**, **depositor**, **customer**, **loan**, and **borrower**

Create Account:

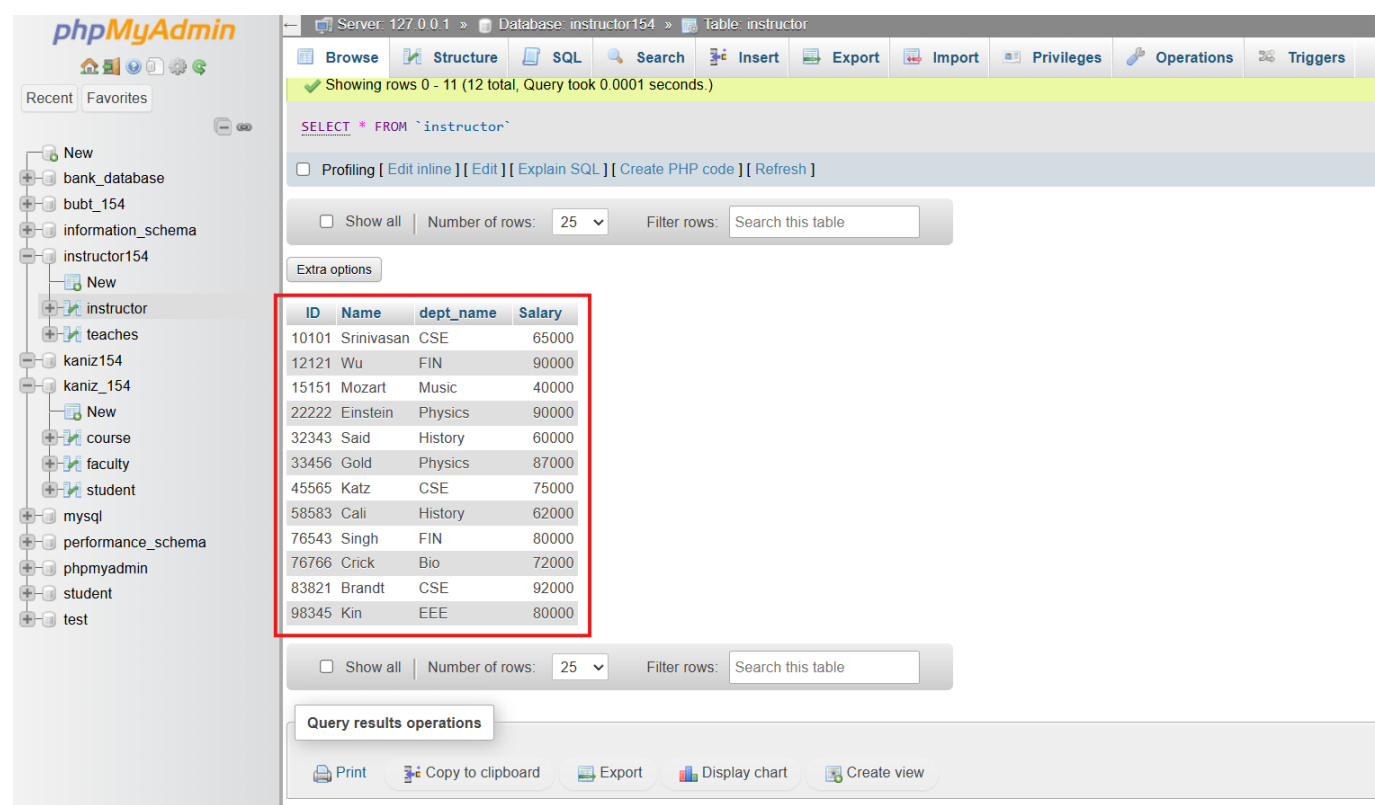

```
CREATE TABLE account (account_number char(5), branch_name varchar(16), balance int(7));  
CREATE TABLE branch (branch_name varchar(16), branch_city varchar(16), assets int(8));  
CREATE TABLE depositor (customer_name varchar(16), account_number char(5));  
CREATE TABLE customer (customer_name varchar(16), customer_street varchar(32), customer_city varchar(16));  
CREATE TABLE loan (loan_number char(5), branch_name varchar(16), amount int(8));  
CREATE TABLE borrower (customer_name varchar(16), loan_number char(8));
```

3. Inserting data into the tables

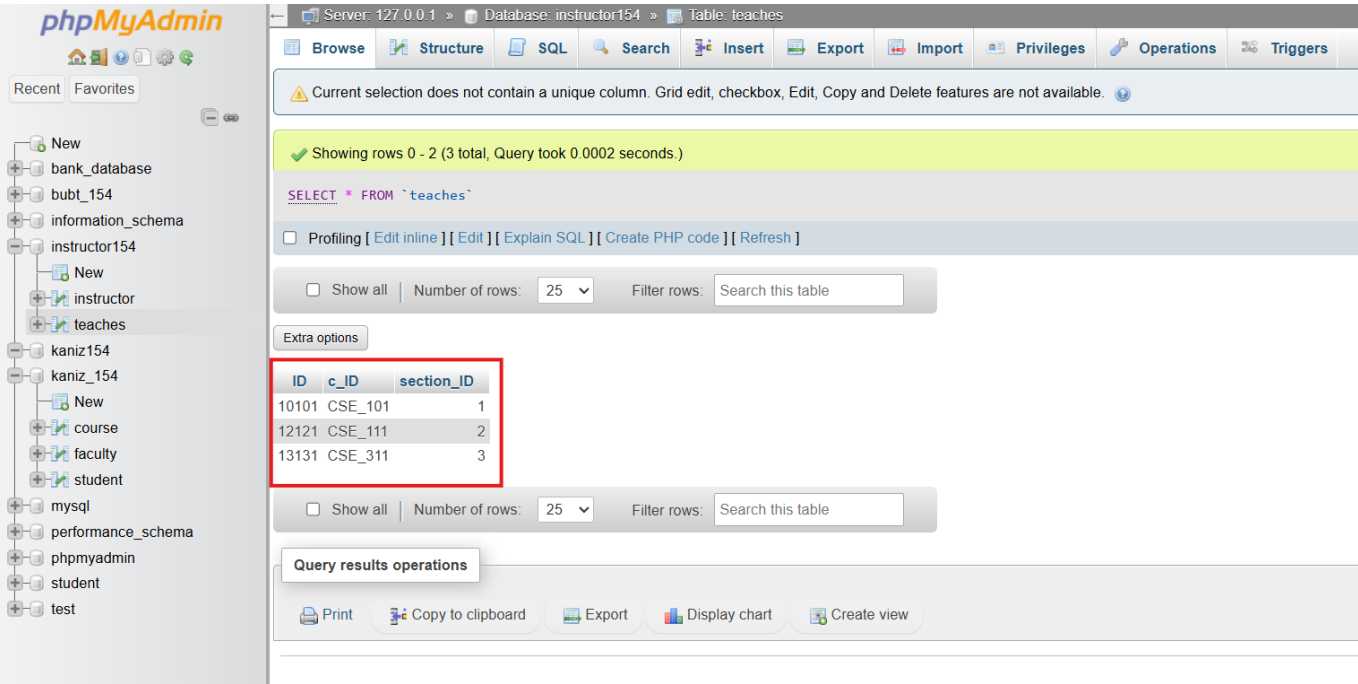

Account:

```
INSERT INTO account VALUES("A-101", "Downtown", 500);
INSERT INTO account VALUES("A-102", "Perryridge", 400);
INSERT INTO account VALUES("A-201", "Brighton", 900);
INSERT INTO account VALUES("A-215", "Mianus", 700);
INSERT INTO account VALUES("A-217", "Brighton", 750);
INSERT INTO account VALUES("A-222", "Redwood", 700);
INSERT INTO account VALUES("A-305", "Round Hill", 350);
```

Branch:

```
INSERT INTO branch VALUES("Brighton", "Brooklyn", 7100000);
INSERT INTO branch VALUES("Downtown", "Brooklyn", 9000000);
INSERT INTO branch VALUES("Mianus", "Horseneck", 4000000);
INSERT INTO branch VALUES("North Town", "Rye", 3700000);
INSERT INTO branch VALUES("Perryridge", "Horseneck", 1700000);
INSERT INTO branch VALUES("Pownal", "Bennington", 3000000);
INSERT INTO branch VALUES("Redwood", "Palo Alto", 2100000);
INSERT INTO branch VALUES("Round Hill", "Horseneck", 8000000);
```

Depositor:

```
INSERT INTO depositor VALUES("Hayes", "A-102");
INSERT INTO depositor VALUES("Johnson", "A-101");
INSERT INTO depositor VALUES("Johnson", "A-201");
INSERT INTO depositor VALUES("Jones", "A-217");
INSERT INTO depositor VALUES("Lindsay", "A-222");
INSERT INTO depositor VALUES("Smith", "A-215");
INSERT INTO depositor VALUES("Turner", "A-305");
```

- performance_schema
- phpmyadmin
- student
- test

The main panel shows the 'Instructor' table selected. The top navigation bar includes: Browse, Structure, SQL, Search, Insert, Export, Import, Privileges. Below this is a 'Show query box' button and a warning message: 'Current selection does not contain a unique column. Grid edit, checkbox, Edit, Copy and Delete features are not available.'

The query execution results are displayed in a yellow box: 'Showing rows 0 - 0 (1 total, Query took 0.0001 seconds.)'. The SQL query is: `Select count(*) from Instructor;`. Below the query, there are links for Profiling, Edit inline, Edit, Explain SQL, Create PHP code, and Refresh.

The results table shows a single row with the value 12 for the count(*) column. This row is highlighted with a red box. The table has a 'Show all' checkbox, 'Number of rows: 25', and a 'Filter rows: Search this table' input field.

Below the table, there is an 'Extra options' button and a 'Query results operations' section with buttons for Print, Copy to clipboard, Export, Display chart, and Create view.
